

Events@HJD: Industrial Visit to adani port at mundra

Date: 21st July 2015 Class : BE-7 Electrical

About The Visit: An Industrial visit for final year students of Electrical Engineering was organized at Adani Port at Mundra (Kutch) to give an exposure for combined efforts of man and machine in industries.

Details of Program:

From the institute 58 students, of final year electrical engineering class with 2 faculty member Shri Mehulsinh Jadeja & Mayur Thacker visited Adani Port at around 10:20 am in the morning. Mr. Bhavin from IT department – adani port was accompanying the trip as adani – representative. He explained most of the routine jobs of the engineering department at the port including cargo handling and other managements for it. The students gathered at Container Terminal – 2 (CT2) to memorize.

During visit students were able to see and acquire practical knowledge about various equipment used in cargo handling and various automation schemes used there for it. Mundra Port is one of the largest private port in India. It is spread over to 100 sq. km. which set's huge demand of automation for its continues and reliable operation & real time reporting. Mr. Devendra – Instrumentation Department – Adani Port – explained the roll of Electrical – Mechanical – Instrumentation – Networking & communication in automation of operation & reporting. Students were able to realize the benefits & challenges of automation.
